

PLATEGRIP

HINGED PLATEGRIP

The Hinged Plategrip fastener is ideally suited for application in uses where the loading and delivery points frequently change, such as mine, pit, quarry, and construction sites.

The hinged steel fastener can be used on all conveyor belts from ¼" to ¾" thick, and allows the joining of belts of varying thicknesses.

A compression-type fastener, secured by bolts, the Hinged Plategrip provides tremendous holding power with good troughing action, while being readily separable after easy installation.

Hinge pins are made of steel cable covered in nylon, the standard for long wear. Alternatives include bare steel or stainless steel.

Note: Each matched set contains one complete joint with hinge pin, nuts and bolts, and filler tubing included.

Hinged Steel is the most common and economical belt fastener material. It is the standard for most applications. Steel fasteners are plated to resist moisture and are available in matched sets ordered by width of belt or as X550-1, X550-3, X375-2, or X375-3 in bulk packs.

STEEL MATCHED SETS

NUMBER	PRICE
X550-16	\$ 30.08
X550-18	31.90
X550-20	37.36
X550-24	40.90
X550-26	46.36
X550-30	52.34
X550-36	63.80
X550-42	75.22
X550-48	86.66
X550-54	98.12
X550-60	109.56

STEEL MATCHED SETS

NUMBER	PRICE
X375-12	\$ 27.32
X375-14	32.26
X375-16	37.16
X375-18	42.08
X375-20	47.00
X375-24	52.46
X375-26	57.38
X375-30	67.22
X375-36	81.96
X375-42	96.72
X375-48	111.48
X375-60	155.10

STEEL BULK PACKS (INCLUDES NUTS & BOLTS)

NUMBER	DESCRIPTION	PRICE
X375-2	25 SETS	\$ 99.24
X375-3	18 SETS	107.18
X550-1	50 SETS	111.30
X550-3	18 SETS	120.20

Hinged Stainless Steel fasteners — nickel and chrome alloy — are best for applications where erosion is a major problem. Stainless steel is more resistant to abrasions, acids, chemicals, and magnetic attraction than standard steel. Plategrip fasteners are available in complete stainless sets.

STAINLESS MATCHED SETS

NUMBER	PRICE
X550-16S	\$ 110.04
X550-18S	120.62
X550-20S	137.52
