

Cam and Groove Style Dry Disconnect Couplings

Compatible with most cam and groove style dry disconnects. The Bayco dry disconnect helps prevent spillage from normal or accidental disconnects. It has a spring loaded sealing device designed to "snap" closed should the valve become disconnected with the poppet open, significantly limiting liquid loss.

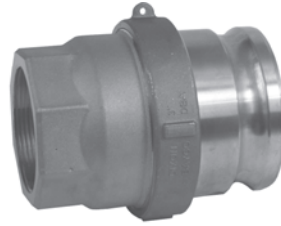

Our dry disconnect couplings are available in a wide range of sizes, metals, and seal materials. Please refer to our product description cross-reference chart for details. Contact the factory at 800-355-1991 for chemical compatibility, size, and material selection. Special configurations can be designed for your application.

Cam and Groove Style Dry Disconnect Adapters

- Two-piece adapter design for easy rebuilding of adapters
- Fully interchangeable with Kamvalok (OPW trademark) style fittings
- Aluminum fittings have aluminum nose piece and brass piston
- For pressure ratings at other temperatures, contact the factory

1½" - 2" adapter

3" adapter
