Standard Natural Rubber Seals

Head	Size	Part #	Price/E	Pkg Qty
small	1/2" - 1"	SLR1	\$1.40	1
medium	1 1/2" - 2"	SLR2	1.70	1

Safety Locking Pin

Warning: The use of a safety locking pin is necessary to ensure that Surelock couplings will not become accidentally disconnected. This guarantees that the fittings are properly connected as the pin will not go through the holes in both couplings until the couplings are locked into place.

SAFETY
ALERT

Part #	Price/E	Pkg Qty
SLP1	\$.36	25

Seal Insertion Tools

When inserting in quantity, seal insertion tools ensure correct alignment of standard Surelock seals.

Head	Size	Part #	Price/E
small	3/8"-1-1/4"	IT100SL	\$124.60
medium	1-1/2" - 2"	IT200SL	124.60

Line Strainer and Lubricator

Size	Description	Pkg Qty	Part #	Price/E
3/8"-1-1/4"	line strainer	15	SLS1	\$139.00
1" FNPT	FNPT x FNPT in-line lubricator	1	SLL1	290.00

To ensure proper operation the lubricator should be installed within 10 feet of the tool to be lubricated.

To adjust the lubricator oil flow:

- Remove the plug. Using a small screw driver turn the jet clockwise to decrease flow, or counter-clockwise to increase flow.
- When adjusted correctly the spray of oil exhausting should cover an area of 10 - 12" in diameter when held 18" away from the subject
