

## Shank Type Fittings

### PF Shank King Combination Nipples

- PF shank King Combination nipples have the same shank pattern as found on the PF style cam and groove fittings sold on page 36. This shank design was developed specifically for chemical transport hoses having Crosslinked Polyethylene (XLPE) or Ultra High Molecular Weight Polyethylene (UHMW) tubes, where shank retention can be a problem when using conventional band clamps.
- Recommended for discharge and suction service
- **Not intended for compressed air**
- Working pressure is given at 70°F maximum
- *The working pressure may vary with the construction of the hose, the type of clamping system used and the application. Consult the factory for recommendations.*
