

## Clamps

### Spring Hose Clamps

- Single wire clamps have the most effective holding force and clamping strength. The single wire concentrates the clamping force in one specific area around the hose.
- Safety glasses should be worn when installing parts. **SAFETY ALERT**
- Carbon steel

Clamps

### Spiral Clamps

For use on convoluted cover hose. To determine which style clamp is needed for your hose look at the end of the hose; if the helix spirals in a clockwise direction away from you (along the hose), a clockwise clamp is needed. If the helix spirals in a counterclockwise direction away from you, a counterclockwise clamp is needed. **Examples include, but are not limited to:** Kuriyama convoluted hose uses counter clockwise clamps; Pacific Echo and Kana Flex use clockwise clamps; Goodyear uses both counter clockwise and clockwise. More than one clamp may be needed per size, contact the hose manufacturer for more information. Clamps are plated steel.

#### Clockwise Wound or Right Hand Spiral

Hose I.D.	Hose O.D. Range		Part #	Price/E
