

## Hydraulic Fittings

### 5600 Series Hydraulic Quick-Connect Fittings

The 5600 series is interchangeable with the Aeroquip 5600, Parker 6600, and ISO A interchange. The two-way check valves in the plug and socket automatically balance in flow position and provide instant shut off when disconnected. To connect, simply retract sleeve, insert plug, and release sleeve. Locks automatically, providing positive pressure tight connection. Permits fast connection and disconnection of gas or fluid lines with minimal loss of media from either end. Full 360° swivel action prevents hose kinking and twisting. Non-valved, slotted valve and straight through units available on request.
