

Notched Turned Back Nipples

- These fittings can be swaged or crimped onto hose, providing improved shank retention.
- The stem can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection to determine its suitability for reuse, it can be reinstalled into another hose by using a new ferrule.*
- When used with double bolt or band clamps, notched turned back nipples will provide shank retention similar to that of the King turned back nipples.
- Notched turned back nipples let you use the same ferrules used with the notched (NO) cam and groove. This lets you maximize your inventory usage and reduce costs.
- See page 316 for the threaded couplings using the notched ferrules.
- Consult the factory for specifications on swaging and crimping procedures.

SAFETY
ALERT

Notched Ferrule

Note: Stems are for use with Lap Joint Flanges on page 461

Notched Turned Back Nipples

Size	304 Stainless Steel		Hose O.D. Range

4"	N400NO	122.70	RN400NO	248.25

Special Pushers required:
 1½" stem - RN150NOPUSH
 2" stem - RN200NOPUSH
 3" stem - RN300NOPUSH
 4" stem - RN400NOPUSH

King Turned Back Hose Nipples for Floating Flanges

- A turned back nipple, when used in a floating flange assembly, allows the flange to be aligned without stressing (twisting) the hose. This generally **increases the hose's service life** by eliminating a common cause of premature hose failure.
- For use with Lap Joint flanges shown on page 461
