

Groove x Groove Check Valves

18-460

Single check valves are used in Fire Protection Systems to allow water flow in one direction only. Typical applications are:

- At connections between public water supplies and private fire services systems
- At the discharges from fire pumps
- At gravity tank connections
- At fire department pumper connections

Designed for use in piping systems where it is necessary to permit flow in one direction and prevent flow in the opposite direction. Supplied with a ½" NPT tapped boss below the clapper. Boss above the clapper may be tapped for the addition of a ½" NPT drain.

- Brass
- For horizontal and vertical installation
- U/L listed and FM Approved
- For use up to **250 PSI** working pressure
