

I-Line Fittings

F

I-Line uses a male and female type connection which makes alignment easier. Add a gasket from a number of elastomers and a special wing nut or bolted clamp to complete the connection. This design has been preferred by the beverage industry for many years.

Dixon Sanitary offers a wide variety of I-Line fittings in 304 and 316L materials in sizes from 1" to 8". This wide I-Line fitting selection is available from our thirteen distribution centers - so we can ship the parts you need within twenty-four hours.

Bradford™ quality: maintaining the standard

The Sanitary Standards were originally created by the dairy industry as a voluntary benchmark for sanitary safety. The standards are still developed collaboratively by a group of processors, suppliers, and sanitation specialists.

Dixon Sanitary has earned the 3A symbol through the Third Party Verification (TPV) program, which requires a professional assessment rather than voluntary compliance to make certain each product conforms in all respects to the published standard. The standards are accepted by the USDA and USFDA.

Bradford™ Sanitary Fittings meet 3A Sanitary Standards for Sanitary Fittings for Milk and Milk Products, Number 63-03 (Authorization number 621). See the Dixon Sanitary website, [www.dixon-sanitary.com](#), to download a PDF of the certificate or call Dixon Sanitary.

Dixon Sanitary is proud to be a participant in the 3A TPV program.
