

Sanitary Custom Fabrications

Dixon Sanitary is now offering custom fabrications. We have full CAD capabilities and can provide a print for your approval.

Once the print is approved, Dixon Sanitary will have the part created from a variety of manufacturers specializing in sanitary components. No part is too tough, we welcome challenges.

Send us your sketches and quantities, no matter the amount, and get connected with Bradford™.

Custom fabrications are available in Wisconsin.

J

Bradford™ quality: maintaining the standard

The Sanitary Standards were originally created by the dairy industry as a voluntary benchmark for sanitary safety. The standards are still developed collaboratively by a group of processors, suppliers, and sanitation specialists.

Dixon Sanitary has earned the 3A symbol through the Third Party Verification (TPV) program, which requires a professional assessment rather than voluntary compliance to make certain each product conforms in all respects to the published standard. The standards are accepted by the USDA and USFDA.

Bradford™ Sanitary Fittings meet 3A Sanitary Standards for Sanitary Fittings for Milk and Milk Products, Number 63-03 (Authorization number 621). See the Dixon Sanitary website, [www.dixon-sanitary.com](#), to download a PDF of the certificate or call Dixon Sanitary.

Dixon Sanitary is proud to be a participant in the 3A TPV program.
