

Stainless Steel Check Valves

A variety of industries have trusted Bradford™ sanitary check valves for many years and the reason is that Dixon Sanitary has the quality valves they need. Bradford™ check valves feature quick-disconnect clamp ends for quick and easy cleaning (other ends available). Check valves are used for sanitary, as well as industrial applications, to prevent backflow.

Bradford™ high quality check valves are available from our thirteen distribution centers - so we can ship the parts you need within twenty-four hours.

Bradford™ quality: maintaining the standard

The Sanitary Standards were originally created by the dairy industry as a voluntary benchmark for sanitary safety. The standards are still developed collaboratively by a group of processors, suppliers, and sanitation specialists.

Dixon Sanitary has earned the 3A symbol through the Third Party Verification (TPV) program, which requires a professional assessment rather than voluntary compliance to make certain each product conforms in all respects to the published standard. The standards are accepted by the USDA and USFDA.

Bradford™ check valves meet 3A Sanitary Standards for Vacuum Breakers and Check Valves for Milk and Milk Products, Number 58-00 (Authorization number 1447). See the Dixon Sanitary website, [www.dixon.com](#), to download a PDF of the certificate or call Dixon Sanitary.

Dixon Sanitary is proud to be a participant in the 3A TPV program.
