

Put manufacturing skill into motion

Lightweight Conveyor Belting from Goodyear Engineered Products is widely recognized in the wood products industry for its premium durability, performance and value. Our unique HPC™ plied construction, premium compounds and innovative cover profiles bring you a product sure to exceed your most exacting demands.

Goodyear offers a variety of compounds and cover profiles to meet any need: from belts that stand up to the turpene content of wood chips, to belts with superior gripping power for conveying wood boards up inclines, Goodyear's got the wood products industry covered.

There's a craft to conveying wood products, and Goodyear Lightweight Conveyor Belt is working hard to hone it.

Constructions

Multi-Plied Spun Polyester

- HPC™ Technology in two, three and four-ply construction
- Superior tracking in both directions
- Resistance to edge wicking and curling
- Exceptional splicing capabilities

Multi-Plied Monofilament

- Covers a wide range of precision applications
- Transversely rigid, HPC construction permits the use of low energy drives and small pulley diameters in high-speed conveying conditions
- Unique fabric design offers edge wear resistance, a low coefficient of friction fabric surface, and maximum flexibility in the warp direction

Single-Plied Interwoven

- High-quality spun polyester warp yarns are woven and bound together with the weft yarns
- Interwoven carcass offers superior splice retention, tear resistance and low stretch qualities for general conveying

Goodyear Lightweight Belt Coding System
