

HY-T® WEDGE TORQUE TEAM®

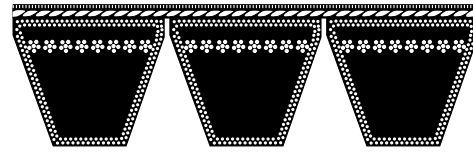

MATCHMAKER® PERFORMANCE

Goodyear Matchmaker technology results in belt consistency run to run. That means each Hy-T Wedge Torque Team is identical in size and performance to every other Hy-T Wedge Torque Team belt in that size, no matter when or where it was produced.

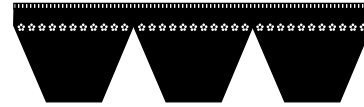

By eliminating mismatch problems, there is no costly and complicated belt matching to get a drive back on line; no problems with belts that are too tight or too loose.

AVAILABLE IN THE MOST EXTENSIVE STOCK LINE IN THE INDUSTRY

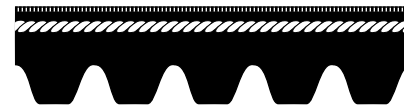

Hy-T Wedge Torque Team belts are available from stock in any number of belts per team, up to the number of ribs indicated. Nonstock lengths are also available in these rib counts, up to a maximum of 730" (180" for 3V cross sections).

**ENVELOPE
5V, 8V CROSS SECTION**

**CUT EDGE
3VX, 5VX CROSS SECTION**
