

POLAR OPTICS™

MCR Safety's Polar Optics® protective eyewear features polarized lens technology that reduces glare without sacrificing clarity, performance or durability. Polarized lenses function similar to window blinds by blocking vertical light from above or below your line of vision only allowing the horizontal light to pass through the lens. This feature eliminates eye stress and fatigue from any surfaces that create glare from sunlight, water, sand, snow, glass and chrome from automobiles or buildings. Polar Optics style #PZ242 meets Z87+ standard and are packaged with a black satin eyeglass bag.

Spatula temple design for a comfortable fit

Lightweight nylon frame

Universal nosebridge comfortably fits large user audience

Polarized lens to reduce glare
