

SPIRALITE FEATURES AND BENEFITS

CONSTRUCTION:

- **MATERIALS:** Pacific Echo hose is made from only virgin materials, providing a clean, non-marking product. Recycled and reground materials are never used.
- **HELIX:** Rigid to resist impact and crushing.
- **WALL AND COVER:** Simultaneously extruded using a patented process to achieve maximum adhesion and flexibility.
- **TUBE:** Smooth bore will not trap contaminants and provides high flow rates. Close tolerances on inside diameter ensure easy, secure coupling.

QUALITY AND VERSATILITY:

Spiralite hoses can replace much more expensive hoses in many applications. Pacific Echo even has formulations for cold weather applications, food and chemical handling.

Each hose is color coded for easy identification and resistance to sun and ultraviolet light.

Spiralite PVC hoses are flame resistant. While they will burn initially, they will self-extinguish after a brief time.

WAREHOUSE LOCATIONS:

- 23540 TELO AVENUE
TORRANCE, CA 90505
(310) 539-1822
- 860 THOMAS DRIVE
BENSENVILLE, IL 60106
(847) 891-8610
- 1903 TELLEPSEN
