

INDUSTRIAL SMOOTHBORE ADAPTORS for JIC to NPT

PARKER/PAGE JIC (SAE) to NPT Adapters are designed to be used with any PARKER/PAGE Field Attachable Fittings that have Female JIC (SAE) 37° swivels. PARKER/PAGE adapters allow an effortless connection between Industrial smoothbore PTFE Hose assemblies with Female JIC (SAE) 37° swivels connecting to Pipe Threads (NPT). These adapters can simplify the most difficult assembly routing problems by eliminating the need to rotate the hose assembly in order to make a threaded connection. By simply loosening the swivel ends and extracting the old assembly, a replacement assembly with swivel ends can be installed in minutes. PARKER/PAGE Adapters are available in most common industrial configurations in 316 Stainless Steel, Carbon Steel and Brass.
