

Quick Disconnect Couplings and Hydraulic Valves

GETTING STARTED

Welcome to the Snap-tite Quick Disconnect & Valve Divisions Electronic Catalog (E-Catalog). With this CD-ROM you will find all of the same literature as in our printed catalog, available now to you in an easy-to-use format. Navigation is simplified when using the bookmarks provided and keyword searching is a breeze with the FIND feature of ADOBE ACROBAT®.

Should this be your first introduction to Snap-Tite Quick Disconnect & Hydraulic Valves division, we welcome and thank you for taking your valuable time to investigate the features and quality of our products. Snap-tite has been manufacturing Quick Disconnect Couplings and Hydraulic Valves since 1935 and has accumulated one of the largest and complete product offerings of its type in the world today.

This new catalog is quite extensive and you should be made aware that the organization has changed somewhat from earlier catalogs. As you may have noticed in the Table of Contents, the products are organized by type of function. Within each of these groupings where applicable, they have been sub-categorized into their separate entities.

NAVIGATION through the E-Catalog is made easy by using the bookmarks found on the left margin. Should you need help in the selection of a suitable product, condensed descriptions with pictures are on each Index page. Hotlinks are also provided on the index pages everywhere the grab hand turns to a pointer.

Should you want to PRINT or EMAIL a specific brochure of the catalog, separate files have been provided that can be opened by going to the Individual Brochure Links found on the next page. You can save the files to your hard drive or use the SEND MAIL feature of ACROBAT®.
