

Turn Clean™ Wing Pulleys

**REDUCES CLEANING PROBLEMS —
PROTECTS CONVEYOR BELTS**

If you've ever cleaned off material build-up from a solid face pulley, you can appreciate the expense and the danger involved. That's why VAN GORP built the exclusive TURN CLEAN™ Pulley. Pulley rotation automatically starts the self-cleaning action, discharging foreign material to the side of the conveyor. Its strong double cone design features individual gussets welded continuously to each wing and hub for longer life. This unique

construction prevents belt misalignment and belt wear because it reduces the possibility of material between the belt and pulley.

Formed contact bars, which are welded to each wing, are the only pulley parts that come in contact with the belt, creating a self-cleaning action which reduces belt strain and wear.

Available in standard sizes from 8" to 36" in diameter and face widths from 12" to 76". Custom pulleys also made to your specifications.
