

### Custom Designed

VAN GORP continues to lead the conveyor pulley industry, not only due to high standards in manufacturing, but also because of its ongoing research and testing programs. We have provided customers with custom designed pulleys for their specific applications, such as wing pulleys with 11" shafts; 8 foot diameter drums; 16½ foot long stub shaft tubes; pulleys with V-grooves in the middle; and special deflection wheels.

### **Pulleys Designed for the Deflection of corrugated side wall belting on "L" and "S" shape conveyors**

11 foot diameter deflection wheels used in a coal mine.

Deflection wheels under the city of Chicago used to excavate storm sewers.
