Engineering Efficient Exploration

ContiTech provides a complete line of quality, cost-effective solutions for Oil + Gas exploration around the world - from site preparation and drilling to cementing and fracturing. We are your complete Oil + Gas solution, and our products are specifically designed to work together for maximum efficiency, reliability and safety.

Oilfield High Pressure

Performing any task in the oilfield industry requires tough products. Especially in the drilling process, equipment must be able to withstand extreme temperatures, pressure and corrosion.

That is why ContiTech branded hoses and assemblies are specifically designed to handle the harsh environments in the field. They keep rigs drilling faster, longer and safer, while minimizing downtime and maximizing productivity.

Prospector™ SHR

› Available 1" to 3" ID

Application

High-pressure rotary hose for slim-hole, work-over or portable drilling rigs. For use with small- to medium-blast, water-well or shot-hole drilling applications. Used in hydraulic oil, mud or air applications, or where pulsating pump is required.

Construction

Polychloroprene tube with four alternating layers of spiralled high-

tensile steel wire for the SHR5000-16 (1") and SHR3650-32 (2"). Six reinforced alternating layers of spiralled high-tensile steel wire for the SHR5000-20 (1¼") through SHR5000-32 (2"). Black Neoprene, pin pricked covers.

Temperature Range

When conveying air: -40°F to 158°F (-40°C to 70°C). When conveying fluids: -40°F to 250°F (-40°C to

121°C). When conveying fluids for SHR3650-32: -40°F to 212°F (-40°C to 100°C). When conveying fluids for SHR3650-48: -40°F to 200°F (-40°C to 93°C).

Fittings

API NPM fittings available. Reference Hydraulic Catalog for options.

Prospector™ BOP 3000

› Fire tested

Application

BOP hose is a hydraulic control connection that is used in the well control system.

Inner Tube

Black Nitrile

Reinforcement

2-Wire Braid Steel

Cover

Pink Neoprene, wrapped finish

Approval / Verification

Independently tested as per test requirements specified by "Lloyd's Register Fire Tests for Flexible Hoses On Offshore Installations" (OD/1000/499 - 29th June, 1992)

and EUB (Directive 036) features Prospector™ BOP Fire Protection Sleeve.

Temperature Range

-40°F to 212°F (-40°C to 100°C)

Prospector™ BOP 5000

Application

A hydraulic control connection that is used in well control systems up to 5000 psi.

Construction

Black, oil-resistant tube with oil- and fire-resistant red cover. Includes four/six high-tensile steel spiral reinforcement. Features Prospector™ BOP Fire Protection Sleeve.

Temperature Range

-40°F to 250°F (-40°C to 121°C)

Cement Transfer

Once the cement is prepared, the well is ready to be cased. Casing, also known as cementing, isolates all water and hydrocarbon-producing horizons from each other, which helps prevent the well walls from collapsing.

On average, it takes 55,000 gallons of cement to transfer the mixture and complete the process. That is why only the toughest hose should be used for this intense process.

Allcrete® Textile

Application

A lightweight high-pressure hose used in cementing, drill mud and fracing operations. Used to transfer from pumps, bulk tank and return lines. Exceeds ASME B30.27-2009 2:1 WP to burst ratio.

Construction

Black ChemiTuf™ synthetic rubber tube, with a Black SBR rubber cover, reinforced with a spiral-plied high-strength fabric.

Temperature Range

-25°F to 180°F (-32°C to 82°C)

Couplings

Contact fitting manufacturer for proper fitting recommendation and coupling procedure.

Order Codes

549-638 ChemiTuf™ Tube and also available in 549-802 Survivor® compound.

› Also available with Survivor compound tube for 2x the life*

Prospector™ Flex Oilfield

Application

Used in the tank truck service industry including oilfield applications, handling crude oil, drilling mud and diesel fuels. In-plant transfer of diluted industrial chemicals and petroleum waste, sludge and sediments. It is not recommended for refined petroleum products or concentrated industrial chemicals. Do not use with gasoline and other

refined products when aromatic content exceeds 35%.

Construction

Nitrile/SBR tube with corrugated Black SBR cover, reinforced with spiral-ply fabric and wire helix.

Liquid Mudd 500

Application

Powerful, heavy-duty discharge hose designed specifically for the transfer of Liquid Mudd at high pressures from mud pump.

Construction

Nitrile synthetic rubber tube (oil resistant). Spiral-plied synthetic

fabric reinforced, plus grounding wires. Black Chemivic™ synthetic rubber (oil resistant) cover.

Features

High pressure reinforced 500 psi, special color coding for safety, weather and oil resistant..

Plicord® Torridair™ Hot Air Blower

Application

Designed to transfer hot, non-oily air - up to 400°F (204°C) - from manifold blowers or in-plant compressors to holding tanks used in the transfer of dry bulk materials.

Construction

Tube: Black, STF (Super Thermo-Flo™) EPDM synthetic rubber reinforced with spiral-ply fabrics and wire helix.

Cover: Black, weather-resistant, STF (Super Thermo-Flo) EPDM synthetic rubber (wrapped impression).
Reinforcement: Spiral-ply synthetic fabric with double wire helix.

Temperature Range

-40°F to 400°F (-40°C to 204°C)

Couplings

ExtremeFlex™ Petroleum Transfer

- › Insta-Lock™ Cam and Groove Fitting System
- › Up to 60% aromatics.

Application

An extremely flexible and lightweight hose for use in tank truck and drilling operation to transfer diesel, ethanol, gasoline, oil and petroleum-based products. Corrugated construction for lower drag coefficient and superior abrasion resistance.

Construction

Black Nitrile synthetic rubber tube with Black Chemivic™ synthetic corrugated cover reinforced with spiral-ply fabrics and wire helix.

Features

Lightweight and flexible, abrasive resistant cover, low drag coefficient of friction, high oil resistance.

Temperature Range

-40°F to 200°F (-40°C to 93°C)

Couplings

Use Continental ContiTech Insta-lock Cam and Groove Fittings.

Prospector™ Petro 150

- › Insta-Lock™ Cam and Groove Fitting System
- › Up to 50% aromatics.

Application

An extremely flexible and lightweight hose for use in tank truck and drilling operations to transfer diesel, ethanol, gasoline, oil and petroleum-based products. Smooth cover construction for lower drag coefficient and superior abrasion resistance. Up to 50% aromatic content.

Construction

Black Nitrile synthetic tube and smooth black SBR cover reinforced with spiral-plyed fabrics and wire helix.

Features

Lightweight and flexible, abrasive resistant cover, low drag coefficient of friction, high oil resistance.

Temperature Range

-25°F to 180°F (-32°C to 82°C)

Couplings

Use Continental ContiTech Insta-lock™ Cam and Groove Fittings.

Prospector™ Flex Petro 150

Application

For use in tank truck and in-plant operations to transfer gasoline, oil ethanol blends and other petroleum-based products.

Construction

Tube: Black Nitrile synthetic rubber

(up to 50% aromatics).

Cover: Corrugated black cover. Reinforcement: Multiple fabric plies with wire helix.

Packaging

Coiled and poly-wrapped.

Branding

Prospector™ Flex Petro 150.

Water Suction / Discharge

This is the practice of moving water from ponds or water tanks to the drilling site, where millions of gallons of water are used. With water constantly running through the hose, only high-quality products should be used for this unrelenting process.

Green Hornet® XF

› Lightweight and Flexible

Application

A medium-duty, lightweight, flexible water and suction discharge hose that retains excellent flexibility in cold weather for drilling operations. The TPE tube provides oil and chemical resistance.

Construction

Black thermoplastic rubber, RMA Class B (Medium Oil Resistance), reinforced with a rigid, lime-green polyethylene helix; available in a variety of custom colors.

Temperature Range

-40°F to 180°F (-40°C to 82°C)

Couplings

Spiraflex® Black

Super Duty

Application

Spiraflex® Black is a lay-flat, heavy-duty water discharge and washdown hose that combines the lightweight, compact features of PVC with the durability and abrasion resistance of conventional construction. This hose features a unique one-piece, through-the-weave construction and attains its working pressure from a synthetic woven textile.

Resists mildew/rot and requires no drying time. Its excellent durability is derived from a high-tensile rubber compound, which completely encases the jacket. Applications include; irrigation, washdown, dewatering, coal preparation and utility plants, gas drilling, jetting and pump discharge, storage tank cleaning and sewer cleaning.

Construction

Nitrile/PVC compound. Both tube and cover are simultaneously extruded to obtain maximum bending. Through-the-weave fabric reinforcement.

Temperature Range

-36°F to 178°F (-37°C to 81°C)

FabChem™

› InstaLock™ Cam and Groove Fitting System

Application

A significant improvement to our chemical hose line. It handles the majority of common industrial chemicals in pressure, gravity flow and suction service.

Construction

Tube: Pliosyn™ Ultra-High Molecular Weight Polyethylene (UHMWPE).

Cover: Green EPDM synthetic rubber with bright orange spiral stripe, corrugated (wrapped impression).
Reinforcement: Spiral-plied synthetic fabric with double wire helix.

Temperature Range

-40°F to 150°F (-40°C to 66°C)

Couplings

Green XLPE

› InstaLock Cam and Groove Fitting System

Application

An XLPE chemical hose used to transfer chemicals from bulk tanks in fracing operations.

Construction

Clear Speciar synthetic rubber Cross-Linked Polyethylene with a

Green EPDM synthetic rubber with spiral white stripe tube, reinforced with a spiral-plied synthetic fabric with double wire helix.

Temperature Range

-25°F to 150°F (-32°C to 66°C)

Couplings

Use Continental ContiTech Insta-lock™ Cam and Groove Fittings with this product.

Order Codes

546-666 (1/2" - 4") and 541-666 (6")

Chem One™

› Industry leading Insta-Lock™ Cam and Groove Fitting System

Application

For the transfer of a variety of current industrial chemicals used today. (Refer to Continental ContiTech Chemical Resistance Guide for compatibility.) For use in pressure, gravity flow and/or suction service. Hose may be cleaned using open-end steam up to 50 psi or in a bath containing

10% sodium hydroxide (NaOH), up to 212°F (100°C).

Construction

Alphasyn™ Modified Cross-Linked Polyethylene (Modified XLPE) with black corrugated abrasion-resistant Omegasyn™ EPDM cover with Red Spiral Stripe.

Reinforcement

Spiral-plied synthetic fabric with double wire helix.

Temperature Range

-40°F to 250°F (-40°C to 121°C)

Order Codes

546-661; Available in a variety of colors to meet your application needs

Top Drive Cable

With your lifelines safely contained inside the ContiTech brand Top Drive Cable, your rigs can run at their peak. It is a vital link for efficient performance in the field. For your Oil + Gas operation, trust Top Drive Cable to protect your investment. Top Drive Cables are designed and made to order to your specifications. Horizontal or longitudinal branded laylines are available.

Top Drive Cable

› ARC Cover 6.8x better abrasion resistance

Features

Top Drive Cable assemblies are custom designed to meet your application needs. Inside diameter and outside diameters can be built

to customer specifications. For more details, please contact our customer service department at **800-235-4632 (US)** or **888-275-4397 (Canada)**.

Jobsite + Support

When it comes to uptime, the ContiTech brand helps you keep rigs running all day, with ease. All of our products are engineered with three key features in mind: reliability, safety and uptime. From crimpers to hoses, in nearly any application, the products you need are designed to help you maximize productivity.

Steel Air

Application

A heavy-duty, wrapped finish, single wire-braid or spiral ply wire air hose for higher pressure service in severe industrial applications including service in drill sites, mines, quarries and construction jobs.

Construction

Black Nitrile synthetic rubber tube with Yellow Chemivic™ synthetic rubber cover.

Features

Heavy-duty abrasive resistance hose, oil resistant and MSHA approved.

Temperature Range

-40°F to 200°F (-40°C to 93°C)

Couplings

Crimp-on NPT and hammer unions.

SR12-SAE 100R12

› New product, very high pressure

Application

Very high-pressure applications subject to surges or flexing, such as construction equipment, oilfield drilling and the high-performance industrial market.

Construction

Polychloroprene inner tube with four alternating layers of spiraled high-tensile steel wire with grey hypalon cover.

Features

Flame resistant, US MSHA designation, abrasion resistant cover.

Temperature Range

-40°F to 250°F (-40°C to 121°C)

Fittings

A complete line of hydraulic fittings to meet your application requirements.

Packaging

3/8" - 1/4" available in 50' box

Engineered Hose Assemblies

Having a reliable system for crimping and fittings is integral to the Oil + Gas industry. Having the latest technology is just as important. Our Insta-lock™ coupling systems provide the strength in connection needed for the tough working environment on the drill site. Additionally, ContiTech branded crimpers meet and exceed specifications, providing a safer working environment and a more productive worksite.

Crimpers and Fittings

To complete the total assembly solution, look no further than the ContiTech Perma-Crimp™ line for Quality Assured Hose Systems. In addition to crimpers, we also offer crimper dies, cabinets, pumps, cut-off saws, skivers, hose/fitting pushers and hose assembly test benches.

Insta-Lock™ Cam & Groove Fitting System

A cam and groove coupling solution designed as a system for use with crimped sleeves on ContiTech Industrial hose.

Perma-Crimp™

Our Hydraulic Perma-Crimp™ system offers peace of mind by providing reliable connections preventing blow offs and failures, which are vitally important in Oil + Gas high-pressure systems.

Perma-Crimp™ PC150

- › Stationary crimper with more power to manufacture hose assemblies.
- › Includes 2-hp electric pump on a common base for bench mounting.
- › Capable of crimping up to 1.5" 2-braid and 4-spiral hose.

Perma-Crimp™ PC600

- › High-volume, high-capacity "production" crimper.
- › 7.5-hp power source, 350 ton cylinder.
- › Fully automated ACT programmable controller.
- › Capable of crimping up to 2.5" braided spiral hydraulic and up to 6" industrial hose.

Perma-Crimp™ PC1000

- › High-volume, high-capacity stationary crimper.
- › Fully automatic ACT3™ microprocessor controller.
- › 1,415 crimps per hour with 450 tons of crimping force.

We have crimpers to handle up to 10" hose.

To learn more about our reliable hose systems, call 800.235.4632

Power Transmission Products

Our rubber compounding expertise helps ContiTech brand belts maximize your power transmission dollar by reducing downtime and enhancing efficiency in the Oil + Gas field. From traditional V-belts to banded belts to premium synchronous belts, our products, along with the latest installation and maintenance tools and seminars, are designed to protect your mechanical drives in the roughest environments. Our focus on real solutions offers you real results.

Power Transmission Products

We have a full line of premium V-Belts and award-winning synchronous products designed for the Oil + Gas industry's tough demands.

V-Belts - Wedge TLP™

Wedge TLP™ Featured Oil + Gas V-belt

Virtually maintenance free, the Wedge TLP™ is well-suited for some of the toughest applications out there, including metal mining, oil and gas extraction, heavy construction, primary metal industries and industrial and commercial machinery.

Banded Belts - HY-T® • Torque Team® • Torque Team Plus®

Torque Team Plus Featured Oil + Gas Banded Belt

Narrow cross-section joined belt with Aramid cords for the industry's toughest and/or high horsepower drives that require higher tension and increased resistance to shock loads.

Synchronous Belts - Falcon Pd® • SilentSync®

Falcon Pd Featured Oil + Gas Synchronous Belt

The rubber composite Falcon Pd® belt offers more value than today's conventional polyurethane synchronous systems. It offers up to 30 more hp capacity,* is up to 6dB quieter and static conductive;† and accepts backside idlers - making the Falcon Pd® an industry leader in mechanical drive operation.

* When compared to Falcon Pd®

† Drive conditions and service variables in combination with time in operation can result in loss of static conductivity. It is recommended that a conductivity check be added to drive preventative maintenance programs where belt static conductivity is a requirement. For more information on static conductivity, visit us

The 3 E's of Efficiency

At Continental ContiTech Technologies, the makers of ContiTech, we are committed to helping you improve your bottom line. That is why we provide a team of drive system specialists, a wide range of products and maintenance tools to help ensure your mechanical belt drive systems run as efficiently as possible. Three simple steps can help you save energy, increase productivity and keep your systems operating at their best.

Evaluate

Competence for facility-wide improvement

As an industry-leading manufacturer of ContiTech branded synchronous and V-configured power transmission belts, we will help you enhance productivity and operational savings, reduce noise and lower energy costs.

Empower

Recommendations that deliver value

With a large selection of industry-leading ContiTech power transmission products, we will help you reduce energy consumption and maximize efficiencies.

Educate

Hands-on training to ensure longevity

Our ContiTech Technical Managers offer a full training curriculum, providing you access to the latest in installation and maintenance best practices.

ContiTech. Engineering Next Level

As a division of the Continental Group, ContiTech is a recognized innovation and technology leader in natural rubber and plastics. As an industry partner with a firm future ahead of us, we engineer solutions both with and for our customers around the world. Our bespoke solutions are specially tailored to meet the needs of the market. With extensive expertise in materials and processes, we are able to develop cutting-edge technologies while ensuring we make responsible use of resources. We are quick to respond to important technological trends, such as function integration, lightweight engineering and the reduction of complexity, and offer a range of relevant products and services. That way, when you need us, you'll find we're already there.
