Warning – Goodyear Hose and Fitting Compatibility

Goodyear hose and Goodyear fittings have been engineered and designed as a complete hose assembly system. Each component of the hose assembly system is compatible with other parts of the system to which it relates. Component compatibility, along with the use of quality components, ensures the production of reliable hose assemblies, when assembled properly. The use or intermixing of fittings and hose not specifically engineered and designed for use with each other is not recommended and may result in the production of unsafe or unreliable hose assemblies. This can result in hose leakage, hose and fitting separation, or other failures, which can cause serious bodily injury or property damage from spraying fluids or flying projectiles. The Goodyear warranty is limited to apply only when Goodyear fittings and a compatible Goodyear hose are assembled with approved Goodyear Clip pliers, or Goodyear crimpers to Goodyear crimp specifications.
