

GOODYEAR POWER TRANSMISSION PRODUCTS

INNOVATIVE PRODUCTS

Goodyear is committed to maintaining a position of industry leadership. We have an enviable history of product innovation and Power Transmission Industry firsts, including:

-  Eagle Pd™ premium synchronous belts with a patented H.O.T. (Helical Offset Tooth) design for reduced noise, reduced vibration, and increased efficiency.
-  Technology that produces perfectly matched belts from run to run which we call Matchmaker® belts.
-  The Maximizer Drive Selection Analysis software program for easy, accurate selection of the best drive for your application.
-  Torque Team Plus® belts with the strength and power transmission capacity to replace large chain drives.
-  Poly-V® belts with nylon fabric rib facing, fiber-loaded rib compounds, and fully machined rib surfaces.

Equally important, the research and development that produced these dramatic improvements is a continuing process. On the horizon we have a multitude of new innovations that are being developed at our Research and Development Center in Lincoln, Nebraska.

That means Goodyear Power Transmission Products will continue to meet the increasing demands for improved drive efficiency, long belt life, and competitive costs.

WE PROVIDE MUCH MORE THAN QUALITY PRODUCTS

Working with Goodyear, you will receive the high level of service and support that is critical to stay ahead in today's business environment. Goodyear power transmission products are available through qualified distributors that are carefully selected and trained to provide much more than quality Goodyear products. A complete selection of value-added services are available like: cost reduction programs, sales and technical support, or inventory control programs.

DISTRIBUTION YOU CAN COUNT ON

Goodyear Authorized Power Transmission Products Distributors are committed to providing you the absolute best in products and service. They are thoroughly trained on Goodyear belting products and stand ready to meet all your power transmission needs.

These distributors are backed by a staff of Goodyear Technical Managers (GTMs) who are specially trained and qualified to conduct in-depth studies of your current operations. In addition, GTMs and our distributors have access to powerful computer programs needed to optimize your current drive/belt applications.

Take comfort in the high level of service, delivery and technical expertise that only comes from a local source backed by a manufacturer with advanced worldwide research and production capabilities.

COST REDUCTION PROGRAMS

We can provide you with the tools and services to reduce your costs associated with power transmission products. Through training and drive analysis software, we can show you how to eliminate problem drives that are bringing down your productivity.

CUSTOMIZED TRAINING

Whenever you need it, wherever you want it, customized training is available for your associates. From maintenance and installation clinics to in-depth training on analyzing failed power transmission products, our distributors and GTMs can give you the guidance needed to choose, install and maintain Goodyear power transmission products.
